## PROFILE

---

- Developer with **2 years of experience** building **end-to-end backend features** for **scalable, microservices-based systems** using **Java Spring Boot**
- Hands-on experience designing and delivering **production-grade business logic** that supports complex, revenue-critical backend workflows
- Strong foundation in developing **high-performance RESTful APIs** with emphasis on **clean architecture, modular design, and reliability**
- Exposure to optimizing backend performance and **search-driven systems** in **large-scale production environments**
- Comfortable owning backend features from **design through deployment and iteration** in **agile engineering teams**
- Currently based in **Ireland** and holding a valid **Stamp 2 visa** with part-time work eligibility
- Actively seeking **Summer Backend / Software Development Internship opportunities**

## TECHNICAL SKILLS

---

Languages	Java , JavaScript
Frameworks	Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Vue.js
Architecture	Microservices, RESTful APIs
Messaging and Streaming	Apache Kafka
Caching	Redis
Databases	MySQL, MongoDB
DevOps and Deployment	Git, Docker, Jenkins, CI/CD Pipelines
Cloud Platforms	AWS Web Services

## EXPERIENCE

---

Quinbay Technologies (Bibli.com)	Coimbatore, India
Software Engineer Intern	Dec 2023 – Jul 2024
Software Engineer	Aug 2024 – Nov 2025

### Indonesian-based E-commerce Company

Quinbay Technologies is a prominent Indonesian e-commerce firm with a wide product portfolio and an extensive nationwide distribution network, recognized for continuous innovation in large-scale commerce platforms.

- **Built and optimized Java Spring Boot microservices** for large-scale **e-commerce and ad-serving platforms**, improving **search relevance, system scalability**, and backend performance.
- **Optimized Apache Solr search queries** and removed redundant caches and controllers, reducing API response time from **700ms to 550ms** and enhancing overall user experience.
- **Automated competitor price benchmarking pipelines** using **Apache JMeter**, proxy IPs, **Solr-based product mapping**, and **cron jobs**, eliminating **100% manual effort** and enabling data-driven pricing decisions.
- **Designed end-to-end production workflows** integrating data crawling, automated mapping, Jira ticket creation, and document uploads, significantly improving **operational efficiency**.
- **Implemented merchant-facing features** including **IMEI barcode scanning**, real-time validation, and automated reward calculation, improving **fraud prevention** and **dealer retention**.
- **Designed UNLIMITED ad campaign logic** with credit-threshold-based delivery, replacing budget-constrained models and increasing **campaign continuity, merchant flexibility, and revenue potential**.

## EDUCATION

---

**Master of Science in Cloud Computing - Present**

National College Of Ireland

**Expected Graduation: January 2027**

**Bachelor of Engineering in Computer Science and Engineering**

Coimbatore Institute of Technology

**CGPA: 8.90**

2020 – 2024
